PROJECTS

NewsApp (MagicNews)

Personal

- https://www.linkedin.com/posts/beshoy-salama-ba734427b_hi-my-dear-connections-today-im-glad-to-activity-7133390573519974400-QCoO?utm_source=share&utm_medium=member_desktop
- October 2023 - November 2023
- An Angular-based project about delivering the latest news seamlessly.
- Utilized Angular (Angular 2+), RXJS, Bootstrap 5, HTML5, and CSS3 to create an easy-to-navigate and interactive UI.
- The goal to provide users with effortless access to diverse news categories, showcasing Angular proficiency in crafting a user-friendly news viewing experience.

E-commerce website (Fresh Cart)

<https://beshoy-edwar-aziz.github.io/Ecommerce/#/home> • September 2023 - October 2023

- Built E-commerce website using Angular framework.
- Implemented optimized search engine and merchandising tools to increase website efficiency by 20%.
- The site provides the ability to add, remove and edit quantity of Cart, the same with Wishlist.
- The site contains Authentication service, providing the user with personal experience giving the user the ability to change his password in case of forgetting the password.

Yummy (Food Recipes Website)

<https://beshoy-edwar-aziz.github.io/Yummy/> • August 2023 - September 2023

- The site provides the user with different collections of recipes from different parts of the world
- The user search for recipes either by typing its name or by searching with the first letter of its name
- The user can find recipes from different cuisinette and geographical origin. Developed an intuitive website by optimizing for improved user experience and search engine

Weather App

<https://beshoy-edwar-aziz.github.io/Weather-App/> • August 2023 - August 2023

- The site gives the user the latest forecast of today and for the next two days as well providing the user with information about wind, precipitation and max and average temperature of the day
- The user can search for forecast of any location just by typing in the search input the location
- The user can give the site permission to access the geographical location of the user without the need to type user's location
